happy_health_startup_theo@tutamail.com

Trusted medical care, delivered to your door. Happy Health connects patients and families to verified nurses, doctors, and medical equipment — on demand, at home.

OUR VISION

Karachi's home-care agencies are expensive and piecemeal. Happy Health puts it all on one doorstep — licensed nurses, doctor home visits, and equipment like electric beds — so patients get quality care, families get peace of mind, and nurses keep more of what they earn.

1 What we offer

Home Nursing

Qualified nurses deliver wound care, injections, vitals monitoring, and post-operative support in the comfort of home.

Doctor Home Visits

Book a verified doctor to visit your home for consultation, diagnosis, and prescriptions — no clinic queue needed.

Medical Equipment Rental

Rent wheelchairs, hospital beds, oxygen concentrators, and more — with delivery and pickup arranged for you.

2 Program snapshot

The six-month SEIC founder program runs Mon / Wed / Fri, each session led by a different guest mentor. Every session's materials are published to the mentor hub and the public GitHub repository.

4
sessions with materials published

Tue 20 Oct 2026	*To be announced*	Data-Driven Sprinting Weekly Card — Week 1 (20–24 Oct) (../assignments/data-driven-sprinting/weekly-card-week-1.pdf)
PDF Any time	Theo	Five-minute pitch deck (7 slides) View pitch (../assignments/happy-health-pitch.pdf)

4 Focus — Six-Month Planning Workshop (14 Oct)

The workshop turned the venture vision into an executable six-month plan. The founder's completed worksheets are published in full:

- **Worksheet A — Vision-to-Goals Canvas:** connects the long-term vision to concrete program goals.
- **Worksheet B — Goal Prioritiser:** ranks those goals so the next six months spend effort where it counts.
- **Worksheet C — KPI Tree:** breaks each goal into measurable indicators of progress.
- **Worksheet D — Six-Month Plan on a Page:** the whole plan — goals, milestones, and measures — on a single page.
- **Worksheet E — Accountability Sheet:** owners and check-ins that keep the plan on track.

5 Focus — Data-Driven Sprinting (from 20 Oct)

The current program block runs weekly sprints against the KPI tree. Each week ships a printed card defining the sprint's focus; Week 1 (20–24 Oct 2026) is linked in the table above and published in the repository alongside the workshop materials.
