STARTUP SYNDICATE

WEEKLY CARD

Data-Driven Sprinting - SEIC Cohort 2

Startup: **Happy Health – Home Medical Care, Karachi – Idea Stage (0 users, planning)**

Week of: **Oct 20-24, 2026 (Week 1)**

1 MY NUMBER one number you can count by Friday

The one number I will watch: **Number of problem interviews completed that confirm would pay @ Rs4500/shift for qualified home care (20 local DHA/Clifton/PECHS + 10 overseas)**

Expert reasoning: Idea stage must prove problem exists before building. Karachi 17.15M, 96% mobile, 70% internet, 32.9% diabetes, 30.4% HTN, 78-89% OOP. Human Healthcare 2022 proves demand in DHA/Clifton 4.9/5.

Today it is: **0 interviews – Idea in head only, 0 users, 0 revenue, 1 founder (Theo)**

2 BY FRIDAY where you want the number to be

By Friday, I want it to be: **8 problem interviews completed (6 local DHA/Clifton/PECHS families + 2 overseas Pakistanis UAE/UK) – 80% say would pay @ Rs4500/shift, plus 4 nurses verified PMDC/PNC + reference + police check**

M6 target path: 30 interviews total → 5 pilot families paid 15 days advance Rs67.5k each → 150 trusted shifts. This week is step 1.

3 MY BET what you will do this week

If I **message 30 families in DHA/Clifton/PECHS WhatsApp groups + call 5 hospital managers / doctors + post in 3 overseas Pakistani Facebook groups (UAE/UK/US) + verify 4 nurses via PMDC portal + previous hospital reference check (Human Healthcare model: license + call hospitals + background + senior doctor supervises first visit)**

my number will go up, because **these families have elderly parents at home with chronic conditions (32.91% diabetes, 30.43% HTN Karachi) who struggle with hospital queues, need qualified care at residence, and overseas sons need peace of mind via Family Health Dashboard. 96% mobile, 70% internet, 147M broadband, 52.6% private health spend proves they already pay private. Human Healthcare 4.9/5 overseas + AKU CarePartner USD billing + Lajpal RN Rs95k-120k/mo proves willingness to pay Rs4500/shift. Nurses exist via Rozee/OLX but need verification.**

4 PASS MARK write this BEFORE you start

It worked if: **8 problem interviews done by Friday 6pm + 80% (6 of 8) say YES would pay for qualified home care @ Rs4500/shift for parent at residence + 2 interviews from overseas families + 4 nurses verified (PMDC/PNC license real checked + previous hospital called + police verification done) + 1 hospital manager / doctor says would refer patients after SHCC license (Sec14(1) all HCEs must be licensed) + notes logged in Excel CRM + interview sheet**

Pass mark must be objective count, not feeling. Count only replies that meet pass mark (Rule 3).

5 RESULT fill this on Friday

What happened: _____

The test: **KEEP / CHANGE / DROP** _____

My number: **KEEP / CHANGE TO** _____

If 8 interviews + 80% yes → KEEP number, scale to 30 interviews M1. If <50% yes → CHANGE number to different segment (e.g., Gulshan vs DHA). If nurses not verified → CHANGE bet to use Rozee.pk + WhatsApp groups for nurses.

GOOD NUMBERS TO WATCH

Calls booked
Orders placed
People who tried it once
Sign-ups
Deposits paid
A date agreed for a trial

For HappyHealth Idea Stage:

- Problem interviews done
- Nurses verified PMDC
- Families consulted 15-min free

SELLING TO BUSINESSES?

1. I asked for an introduction
2. I got a name and a number
Count this today
3. A meeting is booked
Count this on Friday
4. A trial is agreed

For HappyHealth:

1. Asked hospital for referral
2. Got doctor name + number
3. Meeting booked with manager

THREE RULES

1. Message only people who know you.
2. Offer only what you can give this week.
3. Count only replies that meet your pass mark

HappyHealth Rules:

1. Message DHA/Clifton families you know + WhatsApp groups
2. Offer free 15-min onboarding (Human Healthcare model) + doctor within 48h – what you can give this week
3. Count only 80% who say would pay @
